Assessment Updates Oasys Information

Further Revisions to Biodata

What is it?

We recently informed you of some changes we are making to biodata.

The first phase change which has now been completed involved presenting just the mandatory details to users when they first login to Oasys.

The additional research data questions are currently available for completion in the '**My Details**' section of the dashboard.

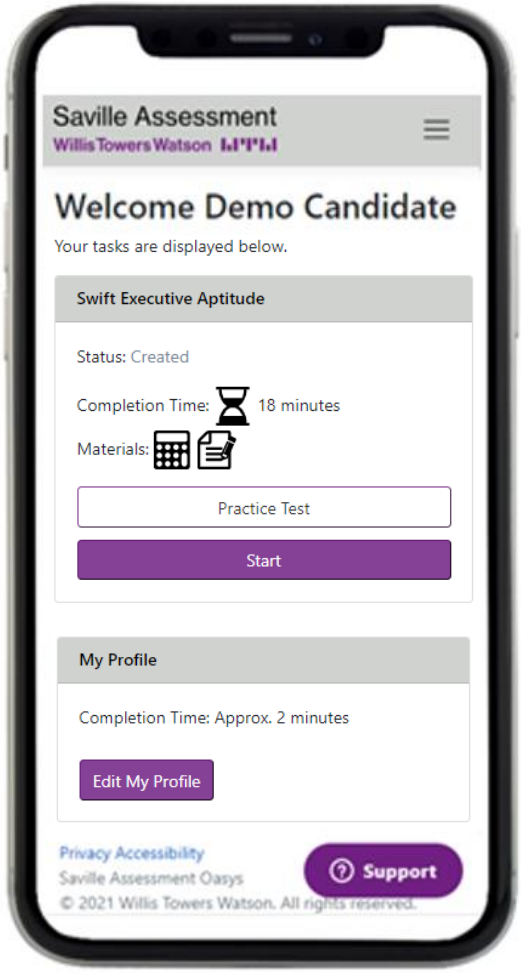
What are the changes?

We are now ready to commence our phase 2 changes.

On the dashboard, the new task tile of '**My Details'** will change to display '**My Profile**.'



There will also be changes to the research data questions. The research data questions have been enhanced to be more inclusive. We have also reduced the number of questions we present to ensure we are collecting only the information required to keep assessment norm comparison data updated.

When will this update be released?

Our phase 2 changes will be released across platforms in all available languages towards the end of August 2021.

Should you have any questions about these, please contact assessment.updates@savilleassessment.com.
