

Assessment Updates Oasys Client Information

Updates to our Leadership Impact 360 instrument and report

Following user feedback, we will soon be making some small updates to our Leadership Impact 360 instrument and report.

What are the Changes?

Instrument

The wording used in the first rater comment question has been amended to ensure that there is no ambiguity.

Old Text

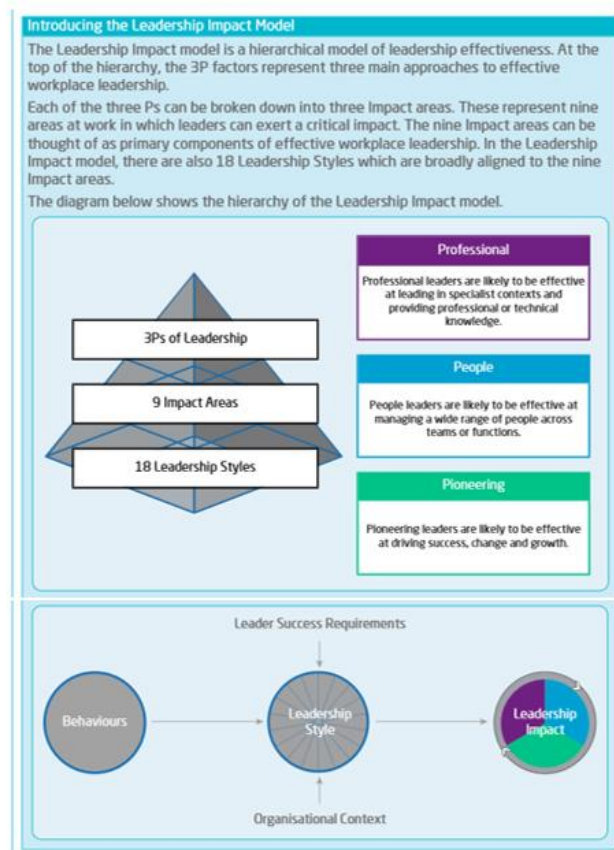

<ratee name> has a positive impact as a leader when they...

New Text

<ratee name> makes a positive impact as a leader by...

Report

A new page will be inserted in between the standard 360 Introduction and Profile Breakdown pages. The new page will present the full Impact Model combined onto one page.

When will it be released?

The updates to the instrument and report are due to be released on the 28th September 2020.

Implications for Use

The changes will have no impact on report scores.

Both changes will be visible once the change has been set to live. For instruments that have already started, the new question text will be visible if they complete after the 28th September.

The report change will be visible if you re-view an existing report i.e. no need to regenerate it after the 28th September.

If you have questions regarding this change, please contact your Account Manager for more information.
