

## Assessment Updates - Oasys Client Information

### Oasys Administration Pages Refresh

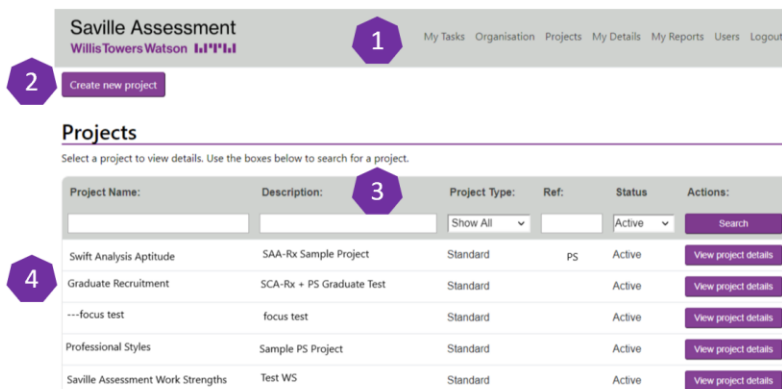

We are currently working on a refresh to the administrator pages of Oasys. The pages are being re-designed to follow the same updated look and feel as the candidate pages and will as a result:

- be responsive in design to allow administrators to perform tasks across a wide range of devices, including mobiles.
- have a more modern, fresh, look and feel that can encompass client's own branding if required.
- be easier to navigate making administrator tasks simpler to manage.

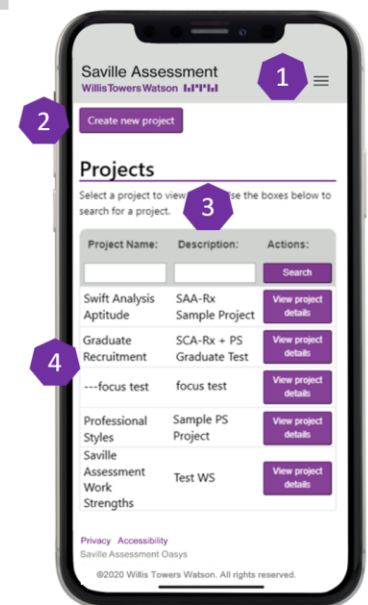

There are no changes being made to functionality. Here are some examples of changes being made.

Current design desktop – Projects page

New design desktop – Projects page

New design mobile – Projects page

1. The menu bar along the top will be moved on the updated desktop version to be in the top right of the page. On a mobile, the menu bar will be collapsed.
2. The options box/links are changing to buttons.
3. On the current version, all project columns are visible. On the new desktop version, all columns are visible. Action icons have been replaced by text buttons removing the need for the icon key on the left. As device screens get smaller, the number of visible action columns will decrease to leave the most frequently used actions available. For example, on the new mobile version only three action columns are visible. If a user wishes to perform an action not displayed on a mobile device, they will need to revert to a bigger screen.
4. The list of project names appears in list order across current and new designs.

## When will these updates be released?

The updated Oasys Administrator platform is currently scheduled for release in Q3-2020. You will not be required to take any action and we will advise you further before the changes are made. The updated screens will be rolled out automatically across all platforms in all available languages at the time of release.

We will also be hosting a webinar '*A Master Class on Oasys*' to enable Oasys Platform Administrators and Oasys Project Administrators a chance to better understand the changes and learn expert tips from our experienced Bureau team in project creation and management on Oasys. More details and information on how to register to follow.

In the meantime, should you have any questions, please contact your Account Manager or the Assessment Updates team at [assessment.updates@savilleassessment.com](mailto:assessment.updates@savilleassessment.com).
