## About this Report

This report is based upon the Wave® Styles assessment, which explores an individual's motives, preferences, needs and talents in critical work areas.

The results are based on a comparison with an international group of over 24,000 professionals and managers.

Since the questionnaire is a self-report measure, the results reflect the individual's self-perception. Our extensive research has shown this to be a good indicator of how people are likely to operate in the workplace. Nevertheless, due consideration must be given to the subjective nature of using an individual's self-perception in the interpretation of these data.

It should be remembered that the information contained in this report is potentially sensitive and every effort should be made to ensure that it is stored in a secure place.

The information contained within this report is likely to remain a good reflection of the individual's self-perception for 12-24 months, depending upon circumstances.

The report was produced using Saville Assessment software systems. It has been derived from the results of an assessment completed by the respondent, and reflects the responses they made.

This report has been generated electronically. Saville Assessment do not guarantee that it has not been changed or edited. We can accept no liability for the consequences of the use of this report, howsoever arising.

The application of this assessment is limited to Saville Assessment employees, agents of Saville Assessment and clients authorized by Saville Assessment.

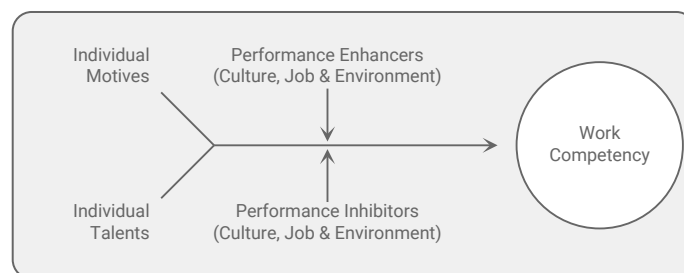

# Introduction

## Competency Potential Profile

The Competency Potential Profile has been developed based on databases which link the facets of the Styles questionnaire to detailed, independent assessments of work performance. This gives a unique prediction of Chris Park's likely strengths and limitations in 12 key performance areas. Underlying components of performance are reflected in the verbal descriptions and scores under each of the 12 competency headings. This prediction should be interpreted against key work requirements as established through job analysis or competency profiling methods. Highly positive profiles may reflect an unrealistically positive self-view whilst low scoring profiles may reflect an overly critical self-view. In such cases, it is particularly important to verify the results against other information.

## Predicted Culture/Environment Fit

The Predicted Culture/Environment Fit gives an indication of the aspects of the culture, job and environment that are likely to enhance or inhibit a person's success. Saville Assessment's groundbreaking research suggests that people's motives and talents interact in important ways with culture, job and environment characteristics to help determine their work performance and competency.

## How To Use This Report

The report can be used in a variety of talent management activities including personnel selection, placement, promotion and talent development. The report is designed to be interpreted by line managers, assessors, interviewers and other key stakeholders to inform their decision making without the need for specific training or expertise in the area of psychometric assessment. The competency model is designed to be universally applicable and is based on extensive research. The relative importance of each competency should be determined at the start of the assessment process. In addition, the information in this report should be used in combination with other work-relevant information about the individual when making employment related decisions.

This report should only be supplied by a specialist who is qualified to use the full range of Saville Assessment Wave tools, including the Expert Report that provides more detailed information (e.g. on an individual's underlying talents and motives).

## Predicted Culture/Environment Fit

Based on extensive Saville Assessment research linking the styles of individuals to culture at work, this highlights the aspects of the culture, job and environment that are likely to enhance or inhibit Chris Park's success:

### Performance Enhancers

⊕	where creativity and innovation are encouraged and radical ideas and solutions welcomed
⊕	where heated debate is valued and people are encouraged to challenge ideas, argue and voice disagreements openly
⊕	where people are encouraged to assume responsibility for important decisions and decisiveness is a valued characteristic
⊕	where the ability to get rapidly to the core of issues and readily identify solutions to problems is highly valued
⊕	where the development of theoretical ideas and concepts is encouraged
⊕	where there is a strong results focus and determination to succeed, no matter what, and people are rewarded for achieving outstanding results
⊕	where there is a strong strategic focus, it is seen as desirable to have a clear vision for the future and strategic thinking capability is highly valued
⊕	where commercialism and entrepreneurialism are valued and the emphasis is on identifying business opportunities and outperforming the competition

### Performance Inhibitors

⊖	where conventional attitudes prevail, traditional approaches are preferred and people are discouraged from generating new ideas
⊖	where dissent is frowned upon and people are discouraged from challenging ideas and voicing disagreements
⊖	where the responsibility for major decisions rests with other people and there is little opportunity to influence the outcome
⊖	where little value is placed on providing new insights and identifying potential improvements
⊖	where there is little interest in the application of theoretical ideas and models and people are given little time to explore different options and possibilities
⊖	where the urge to achieve outstanding results is not great and people seldom persist in the face of difficulties
⊖	where the focus is short rather than longer term, tactical rather than strategic
⊖	where the culture is non-commercial, non-competitive and non-profit oriented
